

MC-434k Mobile Commander

The Mobile Commander unleashes the power of the iPlanTables workstations in to your mobile vehicles and command centers. Don't rely on small screen devices to manage your incident sites. GIS, Google Earth, Personnel Locator Software all can be run and viewed on a 43" 4K touchscreen. Slide your workstation in or out to fit the situation. Tilt it electronically to train or demonstrate to dozens of emergency people at a time!
